0.2 TRAINING POLICY STATEMENT

This manual and all other associated manuals define the organization's procedures upon which Safarilink operating under the Kenya Civil Aviation (Approved Maintenance Organization) Regulations, as revised. These procedures are approved by the undersigned and must be complied with, as applicable; in order to ensure that all the maintenance training carried out by Safarilink is to the highest approved standards.

Considering the critical importance of training as a means to achieve significant progress in terms of the delivery of safety, security and highest maintenance standards: Safarilink acknowledges that training plays an important role in establishing and maintaining a safe aviation culture in the industry. Training is the only way to support the sustainable development of aircraft maintenance practices.

Safarilink Aviation aims to provide professional world-class maintenance training to all its technical staff. We will provide a superior learning environment that will help in the learning process. We will recognize that staff experiences are diverse, and we will be there to lend additional training and guidance: to encourage the continuing professional development of all its Technical Staff.

The Accountable Manager hereby commits to ensure that training activities are sufficiently funded and that qualified personnel will be employed; adequate facilities will be provided and required training materials will be sourced, to enable the provision of a high standard of training that exemplifies safety.

The Accountable Manager hereby acknowledges that these procedures do not override the necessity of complying with any new or amended regulations promulgated by the Kenya Civil Aviation Authority (KCAA).

Alex Avedi
Accountable Manager

INTRODUCTION

GENERAL

1. This Safarilink training program is issued in accordance with the requirements of Kenya Civil Aviation (Approved Maintenance Organization) Regulations and the second schedule of the Civil Aviation (Personnel Licensing) Regulations. The training program is for use by all maintenance, inspection, and certifying personnel.
2. Safarilink shall not use, nor shall any person serve as maintenance staff and/or certifying staff unless he/she meets the initial training, continuation training requirements established by Safarilink and approved by KCAA.
3. The responsibility for content, distribution and amendments rests with the Head of Quality or the Head of Base Maintenance in his absence.
4. It shall be ensured that a copy of this training program is provided to each appointed member of training staff and KCAA. Amendments shall be issued to all holders who will be responsible for amending their copies, incorporate the amendments as soon as possible after receipt.

INITIAL TRAINING

1. Safarilink employs qualified, licensed engineers who have undergone basic engineering theory/initial training from approved training organizations.
2. All trained personnel shall be examined at the end of each training course. The Head of quality should hold and maintain all training records.
3. The training course graduates are granted a certificate of completion stating the aircraft, system, engine, and component type. These certificates will support the eligibility of the individual to certify or maintain a specific type of aircraft, engine, propeller or component and the application to the KCAA for a license with a specific rating or approval
4. Safarilink initial training shall cover the following: -
 - a) Basic engineering theory relevant to the scope of work performed by Safarilink.
 - b) Specific information on the actual aircraft type on which the person is intended to become a certifying person including the impact of repairs and system or structural defects and;
 - c) Company procedures relevant to certifying staff's tasks.

CONTINUOUS TRAINING

All certifying staff of Safarilink who have undergone initial training shall undertake continuous training courses in Safarilink procedures and changes in the standard of aircraft or aircraft component maintained.

Such personnel shall be required to undergo various approved courses such as Human Factors and safety management courses within approved training organizations.

This Training Manual forms part of Safarilink Manuals. The training section and procedures are an integral part of the maintenance organization's approval. No changes shall be made to this document without the approval of the KCAA.

A. GENERAL TRAINING OBJECTIVES

The following are the general objectives of the training department: -

- a) That all applicants for authorization are given adequate training to enable them to reach the required standard.
- b) That apprentices and trainee mechanics obtain a comprehensive training program, which will enable them work with confidence and skill after a period of three years.
- c) That apprentices and trainee mechanics can sit and pass an approved course or license with type rating.
- d) To ensure that the standard of approved courses and examination in use is maintained to meet the requirement for the continuation of approval of the training section.

B. TRAINING CONSIDERATIONS

It is recognized that the training of aircrafts maintenance personnel is of the essence of a practical as well as theoretical nature. The course of training must develop not only the technical skills essential for aircraft maintenance but also ensure correct routines and attitudes. In regard to this it is necessary for instructors to instill in students an appreciation of the value of equipment worked upon, along with economies of effort and technical honesty.

MANUAL CONTROL

A. General

1. KCARS requires the AMO to have a training program approved by the KCAA. Safarilink has prepared and will keep this Maintenance Training Manual current for the company's use and guidance of maintenance personnel.
2. The Head of Quality and Head of Base Maintenance have the authority to establish and modify policies and procedures for their area of responsibility in the manual.
3. The master copy of all manuals will be maintained in the office of the Head of Quality of Safarilink.
4. Safarilink personnel will only use authorized company manuals in the performance of their duties and responsibilities.
5. Pen and ink changes to AMO manuals are not allowed.
6. Whenever uncontrolled /photocopies of technical documents are made these must be discarded immediately after use. Individuals making and using such copies are responsible for their disposal

B. Manual Organization

The page numbering system uses two elements: the chapter number followed by the page number. Under this system, the first page of each chapter begins with that chapter number followed by page 1, and the numbering continues sequentially throughout the chapter.

C. Quality Assurance Responsibility

The Quality Assurance department is responsible for the manual revision process, distribution and tracking of revisions. The department will ensure that proposed manual revisions are coordinated among department heads to ensure content consistency throughout the manual. The department will ensure that the technical library issue the manual to each applicable person or area.

D. Manual Holder Responsibility

Assigned manual holders are directly responsible for the control, revision status and protection of the manual. Each manual holder is required to go over each revision before inserting it in the manual.

E. General Revision Procedures

- a) When a revision is requested the Manual Revision Transmittal Sheet is completed and submitted to the appropriate department head. If the department head justifies the recommended change, it is then forwarded to the Head of Quality. If the proposed revision affects other manuals, as determined by Quality Assurance, the effect will be discussed with the department heads affected
- b) The Head of Quality will determine if the revision requires training, and this will be communicated to the department head involved. The department head will ensure that this training is accomplished prior to the implementation of the revision.
- c) Prior to the submission of the revision, by the Head of quality to the KCAA the department head in conjunction with the Head of Base Maintenance will review the revision.
- d) Each proposed revision submitted to the KCAA will contain:
 - i. FORM QAM/39 (Manual Amendment Advice to KCAA) Revision Instruction sheet
 - ii. One copy of the revision will be forwarded to the KCAA for approval/acceptance as required.
 - iii. A vertical bar placed on the left margin of each page to indicate the revised portion of the page including the LOEP.
 - iv. Two copies of the list of effective pages (LOEP)
 - v. If the revision is found acceptable to the KCAA, the KCAA will sign both copies of the LOEP
 - vi. One copy of the LOEP will be returned to Safarilink. The KCAA will retain the second copy.
 - vii. The technical library will distribute the revision via the Manual Revision Transmittal Sheet

Issue No.	3	SAFARILINK	Part	0
Revision No.	0	MAINTENANCE TRAINING MANUAL	Section	A
Issued	24 Dec 2025		Page	8

F. Manufacturer's Manual Revision

Safarilink Subscribes to Manufacturer's revision service to ensure that all manufacturer manuals are kept current. The Technical Library will revise the manufacturer's manual following the procedures prescribed by each manufacturer. All revisions are sent out to the appropriate manual holders for insertion into specified manuals.

G. Temporary Revisions

Temporary revisions are used to promptly insert a change into a vendor or manufacturer's maintenance, overhaul/ component manual and parts manual, until the permanent issue is prepared.

- a) Temporary revisions will be listed on the record of temporary revisions when inserted into each manual.
- b) All temporary revision transmittals will be signed by the Head of quality and filed by the Librarian on a master file of temporary revision transmittals.
- c) When a temporary revision is adopted and included in a permanent revision. The manual holder will sign the removed date block of record of temporary revisions.

H. Manual Audits

- a) The Head of quality will ensure that the Technical Library distributes to all manual holders a copy of the master list of manuals designating their current revision status.
- b) Each manual holder will review the list and make sure that each manual assigned to them is current. The master list will then be signed by the holder and returned to the Technical Library within 10 days of receipt of the list.
- c) Each manual holder will receive a current LOEP for each of their assigned manuals from the Technical Library. The manual holder will conduct a LOEP audit by matching the LOEP to the current pages in their assigned manuals. When the review is completed, the manual holder will sign and subtract the transmittal form, attached to the LOEP, and return it to the Head of Quality. Any missing or out-of-date pages will be replaced immediately. Planned Audits will be conducted by quality Assurance during the year as per the Annual Audit Plan.

MAINTENANCE TRAINING MANUAL

CHAPTER 1: GENERAL MAINTENANCE AND TRAINING

1.1 GENERAL TRAINING

A. TRAINING PHILOSOPHY

The Safarilink Maintenance Training Program philosophy is to provide all maintenance personnel with the training required to ensure adequate technical knowledge for servicing and maintaining aircraft and equipment in a professional manner. Training is based on a combination of formal classroom training accomplished by approved vendor instructors and /or designated AMO instructors, and on-job training (OJT). Head of Quality will develop procedures and be responsible for developing and revising the training requirements for the AMO.

B. GENERAL INFORMATION AND POLICY

1. Safarilink will maintain a training program to ensure that each person, including inspection personnel who determine the adequacy of work done, is fully informed about procedures, techniques, and new equipment in use, and is competent to perform his/her duties.
2. All personnel responsible for inspection, maintenance functions shall, prior to assignment to these duties, meet the requirements of the maintenance - training program. When circumstances require an assignment prior to completion of training, such assignments shall be accomplished under the direct supervision of a qualified individual. A qualified individual is someone who has received the necessary training required as outlined in this manual.
3. The minimum passing grade for all formal training classes requiring a written test is 75%. Personnel who fail to achieve a passing grade shall be tutored and re-tested.
4. Personnel who miss all or part of the scheduled training will be required to 'make up' areas missed until the course is completed.

Issue No.	3	SAFARILINK	Part	1
Revision No.	0	MAINTENANCE TRAINING MANUAL	Section	1
Issued	24 Dec 2025	General Maintenance and Training	Page	3

C. RESPONSIBILITY

1. The Head of quality and Head of Base Maintenance are responsible for developing and establishing a training program for Safarilink and any contracted personnel. The Head of quality responsibility also includes audits of Formal Training records for Safarilink.
2. The Head of quality has the authority to make changes to the Maintenance Training Manual. Changes will be coordinated with and approved by the KCAA.
3. The Head of quality and Head of Base Maintenance are responsible for the administration of Maintenance Training, Including:
 - a) Scheduling of classes
 - b) Training facilities
 - c) Structuring of the job training program
 - d) Computer-based training.
 - e) Training course development
 - f) Training records
 - g) Assessing training effectiveness
 - h) Administration of Vendor Training Contracts
 - i) Establishing annual recurrent training programs.
4. The Head of Quality is responsible for:
 - a) Monitoring the quality of training; and
 - b) Auditing Safarilink Maintenance Training Program

Issue No.	3	SAFARILINK	Part	1
Revision No.	0	MAINTENANCE TRAINING MANUAL	Section	1
Issued	24 Dec 2025	General Maintenance and Training	Page	4

5. The designated Maintenance instructor at Safarilink shall be appointed in writing by the Head of quality as necessary to satisfy the needs of maintenance training requirements.
 - a) The Designated Maintenance Instructor shall be responsible for conducting maintenance training in accordance with Safarilink procedures and outlines to effectively transfer skills, knowledge and techniques to the students.
 - b) The Designated Contracts Maintenance Instructor shall be provided with Basic Instructor Training from a qualified training vendor.
 - c) The Designated Maintenance Instructor reports to the Head of quality during the performance of his duties.
 - d) A list of Designated Maintenance Instructors and signatures will be kept in the office of the Head of Quality.
 - e) Qualifications for a Designated Maintenance Instructor include:
 - i. The instructor must meet the current training requirements for the instruction being given, have broad knowledge of the subject matter and the ability to teaching techniques.
 - ii. The instructor must have completed the basic instructor training course from an external and recognized training vendor. This basic Instructor training course will be conducted by a recognized training institution using a curriculum approved by Safarilink and the Authority. The instructor should have passed the written and practical exam that cover both teaching skills and ability to present the subject matter.

1.2 MAINTENANCE TRAINING

A. NEED FOR TRAINING

The need for training generally originates from one or more of the following four sources:

1. Acquisition of new personnel
2. Acquisition of new equipment and/or changes to existing equipment, procedures, or maintenance practices
3. Audit findings
4. Regulatory agencies.

B. THE EXTENT AND DEPTH

The extent and depth of training are required for everyone and shall be evaluated by the Head of Quality following set procedures. Training evaluation criteria includes: -

1. Recent experience and time elapsed since last training.
2. Reputation of the training provider for the training received prior to Safarilink. Evidence of completion, i.e. (Training Certificates, School transcripts, etc which shall be verified from their source).
3. Depth and scope of training received and assigned duties and responsibilities.
4. The minimum training all maintenance employees shall receive is the "Basic Induction Course." A certificate shall be issued after an employee successfully completes the Induction course.

C. AREAS OF TRAINING

Safarilink Training program provides for training in the following areas. Personnel will be scheduled for training based on the procedures outlined in this Manual.

1. Induction Training.

This process begins with the initial Induction training, a formal class which covers safety, maintenance related paperwork. Also included is an introduction to Safarilink history, benefits and employee programs. Training should cover company procedures contained in the MPM and associated Manuals.

Issue No.	3	SAFARILINK	Part	1
Revision No.	0	MAINTENANCE TRAINING MANUAL	Section	1
Issued	24 Dec 2025	General Maintenance and Training	Page	6

2. Aircraft Systems Training

Formal classroom training and on the job training for Airframe, Powerplant and Electrical and Avionics systems.

3. Specialized Training

Courses on individual aircraft systems and troubleshooting procedures.

4. Inspection Training

- a) Courses will include a Training course on Duplicate Inspection items and Training course on Receiving Inspection.
- b) Persons designated to perform Duplicate Inspection shall be trained, qualified and authorized by the Head of Quality. Initial training requirements include:
 1. Maintenance Induction
 2. Duplicate inspection
 3. 40 hrs. of aircraft type – formal classroom training (combination of Safarilink Training Course or previous aircraft type Systems formal classroom training experience)
- c) Quality Assurance shall ensure prior to issuance of authorization(s) that the individual's experience and training meet the standard required.
- d) All persons designated to perform duplicate inspection will receive recurrent training every 24 months.

5. On Job Training

Safarilink, for OJT training, utilizes instructors or senior company engineers with ability, knowledge, skills and the ability to determine performance level of trainees. The maintenance personnel have OJT forms which they fill in during their work and/or maintain a Maintenance Record Logbook where they keep a record of their experience.

6. Manufacturers/Repair Vendor Agency Training

- a) Airframe and power plant manufacturers/repair vendor's agencies offer formal training courses to AMO Maintenance personnel.
- b) The Head of Base Maintenance and the Head of quality will evaluate these courses and when such training would benefit Safarilink, they shall determine who will attend.

7. New Equipment Training

- a) Training programs for new type aircraft shall be developed in conjunction with the aircraft manufacturer and major equipment suppliers. A comprehensive training program and schedule shall be established to assure an adequacy of trained personnel prior to introducing new aircraft into service. The Head of quality is responsible to ensure:
 - 1. An approved (by KCAA and Safarilink) training course is developed to meet the maintenance requirements of the new equipment.
 - 2. The Head of Base Maintenance is responsible for ensuring adequate personnel are scheduled for training prior to the introduction of the equipment into service.
- b) When a completely new type of aircraft is added, the minimum training required for maintenance personnel shall consist of at least 40 hours of systems training. In no event shall new aircraft be operated without adequately trained maintenance personnel available at all times. Adequately trained personnel provide for the number of required to support the continuous airworthiness program based on the KCAA approved maintenance program.
- c) Training may be performed by the manufacturer, contracted to a training facility, conducted by an air carrier that provides training, or by Safarilink instructors who have been trained by the manufacturer. All training conducted for purposes of licensing or for authorization shall have been approved to KCAA.

Issue No.	3	SAFARILINK	Part	1
Revision No.	0	MAINTENANCE TRAINING MANUAL	Section	1
Issued	24 Dec 2025	General Maintenance and Training	Page	8

8. Recurrent training

- a) Recurrent training shall be tailored to the requirements of Safarilink and contractor employees and developed as the need is identified.
- b) Recurrent training shall be offered to all Maintenance personnel with courses tailored to job assignment and duties (i.e. duplicate inspection, Airworthiness Release and /or sign off Authorization, Receiving Inspector): maintenance program changes; safety; MM revision; and requirements identified as a result of Audit analysis.
- c) Recurrent training shall be conducted on a 2-year basis and shall consist of at least eight (8) hours of training.
- d) The Head of Quality will define the requirements of recurrent training.

9. Dangerous Goods Regulation Training

- a) This training should be included in initial induction training for Stock Clerks.
- b) Training will be reviewed annually, with an emphasis on the selection of subjects to particularly review those areas appropriate to company operations.
- c) The training program for personnel handling materials and stores in the compatibility, loading, storage, and handling characteristics of hazardous articles shall satisfy both initial and annual/recurrent training requirements.
- d) The Dangerous Goods Regulation Training Program is contained in the Maintenance Training manual Chapter 3.

10. Differences Training

When aircraft are added, of the same basic type, but different series, different course covering shall be provided. The course shall be of adequate length to cover the differences between the series. The Head of quality is responsible for developing the course and the Head of Base Maintenance is responsible for ensuring an adequate number of personnel are trained to support flight operations.

11. Fueling Training outline is found in Chapter 3 of this manual.

1.3 FORMAT, COURSEWARE, FACILITIES, AND INSTRUCTOR PRE-QUALIFICATION STANDARDS

A. FORMAT

1. A Training program is a system of instruction that includes curriculums, facilities, instructors, supervisors, courseware, instructional delivery, methods, testing checking and record keeping procedures.
2. The system of instruction must satisfy the objective of the training program as stated in the programs “introduction” section.
3. The curriculum is the outline (modules) upon which the full training, testing and checking program is based.
4. Each training program identifies the originating department and classification of the employees required to receive the training, inclusion of recurrent training if required, and the location and responsibility for the training records.

B. COURSEWARE

1. Instructional material developed for each curriculum is called “courseware”. This information is in lesson plans, instructor guides, computer software programs, audiovisual programs, and workbooks. Company manuals and various pertinent handouts.
2. The course must accurately reflect curriculum requirements, be effectively organized and properly integrate with instructional delivery methods.
3. Methodology for conveying information to a student may include lecturers, demonstrations, simulations audiovisual presentations, home study assignments. Workshops and drills.
4. Training devices, computer workstations and on the job training sessions, are also to be considered instructional delivery methods.

C. FACILITIES

1. Facilities adequate to accomplish certain training modules vary greatly in size and complexity. During the development of a training program consideration of such items as number of students training aids existing materials combining training with another division, and cross- utilization of instructors should be taken.
2. If the training is to be accomplished by a third-party facility, such should be indicated in the introduction program.

D. INSTRUCTORS:

1. Departments should use caution in the selection of an instructor. These training instructors should meet the requirements of an Aviation Instructor. The degree of success hinges directly upon the quality of presentation notwithstanding the training aids and facilities.
2. Many times, a fully competent and skilled instructor can be found or developed within existing department personnel.

E. INSTRUCTOR PRE-QUALIFICATION STANDARDS

The Safarilink Aircraft Maintenance Instructor (AMI) possesses the following minimum qualifications:

1. Hold a valid AMEL (Aircraft Maintenance Engineer Licence) as is appropriate
2. Shall have detailed knowledge of all aspects of the respective subject areas.
3. Shall be skilled in Aircraft Maintenance with work experience of more than five (5) years.
4. Demonstrate satisfactory knowledge of the contents and interpretation of the following publications:
 - a. Kenya Civil Aviation/Regulations
 - b. Advisory Circulars
 - c. Maintenance Training Manual
 - d. Maintenance Procedures Manual
 - e. All other manuals relevant to scope,
 - f. Company policies and procedures

Issue No.	3	SAFARILINK	Part	1
Revision No.	0	MAINTENANCE TRAINING MANUAL	Section	1
Issued	24 Dec 2025	General Maintenance and Training	Page	11

5. Shall either:

- a. have passed a knowledge test on the fundamentals of Instructing.
- b. be nominated and appointed by Safarilink, in accordance with **Section 1.3(D)(1) and (2)** of this MTM, and be confirmed as proficient in the fundamentals of instruction, including:
 - i. Elements of effective training and instructing
 - ii. Trainee evaluation and testing
 - iii. Course Development
 - iv. Lesson Planning
 - v. Classroom Training and Instructing Techniques
 - vi. Techniques of applied Instructions and procedures
 - vii. Use of training and Instructional aids
 - viii. Analysis and correction of trainee errors
 - ix. Human performance relevant to Trainee Instruction

1.4 KCAA “APPROVED” OR KCAA “ACCEPTED” TRAINING PROGRAMS

A. VITAL TO SAFETY

Training programs that directly involve certain areas vital to safety in air transportation are required by KCAA Regulations. These programs involve maintenance, safety and other areas where Safarilink personnel are responsible for achieving the intent of the safety rule.

B. INITIAL APPROVAL

In these instances, Safarilink has created training methods and techniques to meet the intent of the rule. The KCAA grants “initial approval” which conditionally authorizes Safarilink to begin instruction to quality personnel under a specific program, pending an evaluation of training effectiveness.

C. FINAL APPROVAL

When the KCAA evaluation establishes that the program accomplishes the intended goal then “final approval” is granted to a specific program segment.

D. AFTER APPROVAL

Once the KCAA “approves” or “accepts” a training program or segment of training program, Safarilink will not deviate from the specifics of such programs unless or until a modification is submitted, evaluated and approved by the KCAA.

E. APPROVAL SIGNATURE

Each of these programs carries the signature of the approving KCAA inspector. Each such program must be identified as such in this Maintenance Training Manual.

1.5 OBSERVATION AND EVALUATION OF TRAINING SESSIONS

A. OBSERVATION

Training, tests and curriculum of formal and OJT will be monitored on an ad hoc basis by the Head of quality or his designee to verify that each student / graduate is receiving or has received training which is commensurate to his/her duties.

Sufficient sampling of the training sessions should be observed to establish a basis for realistic evaluation for instruction technique, skill ability and knowledge of subject matter. Appropriate adjustments to the curriculum and /or program may be made as needed.

This may involve changing courseware, instructional delivery, or minor revision of the curriculum. Conversely, substantial change to the curriculum may be required if the desired outcome is not achieved.

B. RESPONSIBILITY

In all instances it is the responsibility of the Head of Quality or his designee to evaluate and record both the dates and the effectiveness of all training for personnel.

Issue No.	3	SAFARILINK	Part	1
Revision No.	0	MAINTENANCE TRAINING MANUAL	Section	1
Issued	24 Dec 2025	General Maintenance and Training	Page	14

1.6 THIRD PARTY TRAINING CONTRACTS AND PROGRAMS

A. RESPONSIBILITY

The Head of Quality is solely responsible for negotiating, scheduling, observing, evaluating, and modifying training conducted for Safarilink employees by a third party at either the AMO base or a facility operated by the third party. Unless otherwise authorized, all courses should be by KCAA Approved Training organization and personnel.

B. REPORTS

Reports of evaluations, Changes or actions taken shall be retained in the Quality Assurance Department training files for at least a 24-month period following the date of the evaluation or action taken.

1.7 MAINTENANCE TRAINING RECORDS

A. MASTER RECORD

The Quality office maintains a Master Training Record, Form QAM/49, for each maintenance employee. The Training Record shall reflect documentation on the job training (OJT), formal training, pertinent certificates, licenses and previous aviation experience. The Head of quality will be the custodian of the Safarilink and Contract Agency training records.

B. REVIEW

Head of Quality shall review, on a quarterly basis, the training status of maintenance personnel.

C. FILE RETENTION

Head of quality will maintain training records on file for one (1) year after an employee leaves the company.

D. FORMS

The following Safarilink forms are used to document maintenance training and qualifications.

- QMS/36: Class Attendance Record
- QAM/51: Initial Induction Training Checklist
- QAM/52: Staff competence Assessment form
- QAM/58: Maintenance Experience Record.

1.8 CLASS ATTENDANCE RECORD, DETAILS

A. DESCRIPTION

The Designated Maintenance instructor shall utilize this page form document formal classroom instruction attendance and will be reviewed and monitored by Quality Assurance department on a regular basis to ensure all Maintenance training requirements are met.

B. PROCEDURES

The designated instructor completes Form: QMS/36 entering appropriate information into the numbered areas as follows:

1. Course Name
2. Date the Training is completed
3. Duration of the course in days and /or hours
4. Specific section or part of the course name (if applicable)
5. Employee Name
6. Employee Number
7. Title of Employee
8. Employee's Supervisor
9. Employee's assigned location
10. Instructor's Name (print)
11. Instructor 's Signature
12. Hours attended
13. Subject hours
14. Score for first week/ days training
15. Second week score (if applicable)
16. Average Grade
17. Instructor indicates Pass, Fail or incomplete
18. Date the filing is completed
19. Signature of the person updating the Training Record
20. Signature of the person filing the Training Record

Issue No.	3	SAFARILINK	Part	1
Revision No.	0	MAINTENANCE TRAINING MANUAL	Section	1
Issued	24 Dec 2025	General Maintenance and Training	Page	17

C. DISTRIBUTION

The Designated Instructor completing the form shall forward the original Form: QMS/36 to quality Assurance for updating Training Record

D. RECORD KEEPING

Training Records are maintained by the Quality Department

1.9 INITIAL INDUCTION TRAINING CHECKLIST

A. DESCRIPTION

Employee induction ensures that employees are trained in company policies and procedures. It may take multiple sessions with various instructors to complete. The FORM: QAM/51 provides a means for documenting the various elements of initial induction training and training completion for each employee.

B. RESPONSIBILITIES

1. Newly Hired Employees

- a. Each newly hired employee shall receive form: QAM/51 as part of his new hire package.
- b. It is the new employee's responsibility to maintain this form during the induction Training Process and ensure that he /she signs each item of instruction and makes entry of the instructor's name.
- c. Once completed, the new employee shall turn over to the immediate supervisor for records processing.

NOTE: Employees shall complete induction training within the first 45 days of employment.

2. Immediate supervisor

- a. The employee's immediate supervisor (Crew Chief, etc.) is responsible for scheduling the hired employee for any induction training warranted.
- b. Forward completed Form: QAM/51 to Quality Assurance for Training Record update.

3. Designated Instructor is responsible for providing the necessary instruction for subject and signs.

4. The Head of quality is responsible for ensuring that all subjects to complete new hire employee induction are completed and for updating individual employee's Training Records

5. Failure to complete induction Training during the first 45 days of employment may require the removal of the employee from service until training is completed.

C. PROCEDURES

Form: QAM/51 is to be filled out as follows:

1. Enter employee name
2. Enter employee number
3. Enter employee classification or title
4. Enter employee date of hire
5. Enter instructor's name when training element is completed
6. Enter date training element is completed.
7. Instructor's signature

D. DISTRIBUTION

Quality Assurance shall receive the original of Form: QAM/51 after the employee's training is completed.

E. RECORD KEEPING

The initial induction Training Checklist, Form: QAM/51 shall be retained permanently as part of the individual employee's training record.

Issue No.	3	SAFARILINK	Part	1
Revision No.	0	MAINTENANCE TRAINING MANUAL	Section	1
Issued	24 Dec 2025	General Maintenance and Training	Page	20

1.10 MAINTENANCE PERSONNEL OJT TRAINING RECORD – FORM: QAM/48

A. PURPOSE

Form QAM/48 is used to record and control evidence of practical training, on-the-job training, and practical competence assessment completed by maintenance personnel. The form may be used for training and assessment conducted internally by Safarilink or for practical reviews conducted by an approved contracted third-party training organization, including an ATO, where applicable.

The form provides objective evidence that the employee has completed the required practical training or review, has been assessed against the applicable standard, and has been found competent for the task, function, qualification, or scope recorded.

Where a logbook, practical assessment record, or equivalent training record is used by the training provider, such record shall be referenced and retained as supporting evidence to this form where required.

B. RESPONSIBILITIES

- i. The **Instructor** conducting the training or practical review shall ensure that the training or assessment is performed in accordance with the applicable approved data, training standard, course requirement, or company procedure, and shall certify only those tasks or functions that have been satisfactorily demonstrated.
- ii. Where the practical review is conducted by a contracted third-party ATO, the ATO instructor or assessor, the authorized signatory shall complete the applicable training record, logbook entry, or assessment record in accordance with the approved training arrangement. Safarilink shall review and accept such evidence before updating the employee's Master Training Record.
- iii. The **Supervisor or Company Representative** shall verify that the training or practical review is relevant to the employee's assigned duties or authorization scope and that the submitted record is complete and acceptable.
- iv. The **Quality Assurance Department** shall maintain control of Form QAM/48 and all referenced supporting evidence, including logbooks and third-party training records accepted by the AMO, and shall update the employee's Master Training Record accordingly.

C. PROCEDURES

1. Print employee's name
2. Employee's signature
3. Enter employee number
4. ATA code associated with the training
5. Date training is completed
6. Total number hours to complete the training
7. Description of the training that took place
8. Printed Instructor's name
9. Instructor's signature
10. Instructor's Employee number
11. Supervisor/ Maintenance Signature

D. RECORD KEEPING

The original Form QAM/48, together with any attached or referenced supporting evidence such as logbook extracts, assessment forms, certificates, or third-party ATO practical review records, shall be retained by the Quality Department as part of the individual employee's Master Training Record.

1.11 TRAINING RECORD – FORM: QAM/49

A. PURPOSE

Used to document the training for each Safarilink Maintenance employee. After each training session will be entered on this form. The training record will contain provisions for both formal training and on the job training (OJT)

B. RESPONSIBILITIES

Quality Assurance shall maintain a FORM: QAM/49 for each maintenance employee. This FORM: QAM/49 shall be the official record of the employee's training at Safarilink.

C. PROCEDURES

Enter the following information:

1. Employee Name
2. Employee Number
3. Employee Hire Date
4. Course Title
5. Course Number (if applicable)
6. Credited Hours
7. Completion Date
8. Comments relevant to the training
9. Subject (e.g." Engine Borescope")
10. Date Completed
11. Number of hours
12. Specific qualifications such as "hot section", compressor, etc. or specific section of the manual.
13. Comments, as applicable

D. DISTRIBUTION

The Master Training Record shall be kept on file by Quality Assurance.

E. RECORD KEEPING

Form QAM/49 shall be retained on file for two (2) years following an employee's departure from Safarilink.

1.12 TRAINING FACILITIES

A. TRAINING ACCOMODATION

If training is in-house, Safarilink will choose an appropriate room to be used as a classroom as per requirements.

If the training is to be conducted by another organization, the Head of Quality will have to ensure adequate accommodation, qualified instructions, teaching aids and materials and that the institution is approved for the required training.

1.13 EXAMINATIONS

A. EXAMINATION PROCEDURES

Examination procedures vary from course to course. The following describes the procedure cases: -

1. **Basic Course:** An examination will be given after the course is completed. The examination will consist of a multiple-choice question paper or/and an essay question paper. A 70% pass mark in each paper is required for the successful completion of the basic course.
2. **Type course:** An examination will be given after the course is completed. The examination will consist of a multi choice question paper only. A 70% pass mark is required for the successful completion of the basic course. Certain courses contain stage examinations. A minimum stage pass mark of 50% must be achieved to continue to the next stage. A course pass mark of 70% is required for the completion of these courses, to receive a certificate for the course.
3. **Refresher courses:** These courses will use elements of the Type course syllabus, with the emphasis on modifications and changes to company procedures. Pass mark is 70%.
4. **Grant of Authorization:** Candidates for grant of an authorization are required to complete an initial course appropriate to the authorization applied for, and a pass mark of 75% must be attained.

For the initial grant of an authorization candidates must undertake a course on company procedures with a 100% attendance record and a pass mark of 70%. A candidate for the grant of extension to his authorization may be required to undertake a refresher course.

B. ORAL EXAMINATION

On completion of the initial type course and experience requirements, Candidates for authorizations will be required to undertake an oral examination on the aircraft engine or system type applicable to the authorization requested.

This examination will be conducted by a panel consisting of:-

- i. The Head of Quality
- ii. The Training Instructor
- iii. A representative nominated by the Head of Base Maintenance.

On the satisfactory completion of this examination the authorization will be granted.

MAINTENANCE TRAINING MANUAL

CHAPTER 2: TRAINING COURSES

Issue No.	3	SAFARILINK	Part	2
Revision No.	0	MAINTENANCE TRAINING MANUAL	Section	2
Issued	24 Dec 2025	Training Courses	Page	2

2.1 COURSE: DHC-8-100/200/300 (CLASSICS) SERIES TYPE TRAINING

A. COURSE DEFINITION

Course Objective:	The objective of this training is to provide a licensed engineer/ technician with <u>INITIAL</u> type training of the DHC-8-100/200/300 Series with P&WC PW120/ PW120A/ PW121/ PW123B/C/D/E Series Engines , to properly maintain it in accordance with the Manufacturer Maintenance Program.
Candidate Qualification:	Candidates for this program should have completed a Basic aircraft course and those who have attained a license without type rating.
Instructor Qualification:	a designated Instructor as qualified by Quality Assurance on aircraft type.
Teaching Methods:	Classroom lectures.
Course Time:	110.5 hours / 16-days
Training Equipment:	Multimedia and Overhead projector
Training Materials:	Training Manual and handouts
References	Dehavilland of Canada /Textron Aviation Inc, & Pratt and Whitney manuals
Standard for Grading Students:	A written test will be given at the end of the course, passing grade of 75% is required. If a student does not obtain a passing grade the instructor will review the failed subject areas and retest the student.
Course Outline:	See the following page

Issue No.	3	SAFARILINK	Part	2
Revision No.	0	MAINTENANCE TRAINING MANUAL	Section	2
Issued	24 Dec 2025	Training Courses	Page	3

B. COURSE OUTLINE

1. General Descriptions	6.0 Hours
a) A/C Publications and MEL (ATA 100)	
b) A/C General and Servicing (ATA 5-12, 20)	
c) ATA 38 Water and Waste	
a) Damage Tolerance Design features	
b) Service Bulletins /Modifications	
c) Maintenance inspection program	
2. Aircraft Systems (excluding ATA 25, 37 & 45)	68.0 Hours
a) ATA 21 Engine Bleed, Air Conditioning, Pressurization	6.0
b) ATA 22,23,31,34,44,46 Avionics, Indication/Recording	6.0
c) ATA 24 Electrical Power	11.0
d) ATA 26 Fire Protection	2.0
e) ATA 27 Flight Controls	9.0
f) ATA 28 Fuel Systems	5.5
g) ATA 29 Hydraulic Systems	5.0
h) ATA 30 Ice and Rain Protection	5.0
i) ATA 32 Landing Gear	7.0
j) ATA 33 Aircraft Lighting	1.5
k) ATA 35 Oxygen Systems	2.0
l) ATA 36 Bleed Air System	3.0
m) ATA 49 APU	3.0
n) ATA 50-57 Aircraft Structures	2.0
3. Propeller (ATA 61) and Powerplant (ATA 71-80)	19.0 Hours
a) ATA 61 – Propeller Components and Operations	5.0
b) ATA 71 – Electronic Control Harness Lightning Protection	14.0
c) ATA 72 – Engine Component Description	
d) ATA 73 – Powerplant Fuel System	
e) ATA 73 – Electronic Engine Control	
f) ATA 74 – Ignition	
g) ATA 75 – Pneumatic	
h) ATA 76 – Controlling	
i) ATA 77 – Indicating	
j) ATA 80 – Engine Starting	
4. Differences 100 to 200/300	6.0 Hours
5. Review and Test	6.0 Hours
6. Hands on Practical Element	5.5 Hours
7. Total Hours	110.5 Hours

2.2 COURSE: DHC-8-100/200/300 (CLASSICS) SERIES TECHNICAL CONTINUATION

A. COURSE DEFINITION

Course Objective:	The objective of this training is to provide <u>RECURRENT</u> technical continuation training for maintenance personnel on the DHC-8-100/200/300 Series with P&WC PW120/PW120A/PW121/PW123B/C/D/E Series Engines , with emphasis on current airworthiness information, system review, maintenance practices, and continued competence in line and base maintenance activities in accordance with the applicable maintenance manuals and approved training curriculum..
Candidate Qualification:	Candidates for this programme should be maintenance personnel who have previously completed DHC-8-100/200/300 (Classics) Series type training and those who have attained a license without type rating.
Instructor Qualification:	A qualified instructor authorized for the aircraft/engine type and course scope in accordance with Safarilink's approved instructor qualification and authorization procedures, or, where training is subcontracted, by the contracted ATO.
Teaching Methods:	Classroom lectures.
Course Time:	5-day / 35.0 hours Course
Training Equipment:	Multimedia projector
Training Materials:	Training Manual and handouts
References	Aircraft Type manuals
Standard for Grading Students:	Written test will be given at the end of training, passing grade of 75% is required. If a student does not obtain a passing grade the instructor will review the failed subject areas and retest the student.
Course Outline:	See the following page

B. COURSE OUTLINE

1. General Descriptions 7.0 Hours

- a) Course Introduction
- b) Aircraft Recent News
- c) Service Difficulty Reports
- d) Airworthiness Reports

2. Aircraft Systems 17.0 Hours

- a) ATA 21, 36 Engine Bleed, Air Conditioning, Pressurization
- b) ATA 22, 23, 31, 34 Avionics, Indication/Recording
- c) ATA 24 Electrical Power
- d) ATA 26 Fire Protection
- e) ATA 27 Flight Controls
- f) ATA 28 Airframe Fuel
- g) ATA 29 Hydraulic
- h) ATA 30 Ice /Rain Protection
- i) ATA 32 Landing Gear
- j) ATA 33 Lighting
- k) ATA 35 Oxygen

3. Propeller (ATA 61) and Powerplant (ATA 71-80) 7.5 Hours

- a) Engine Component Description
- b) Powerplant Fuel System
- c) Electronic Engine Control
- d) Electronic Control Harness Lightning Protection
- e) Engine starting
- f) Ignition
- g) Oil
- h) Pneumatic
- i) Indicating
- j) Controlling
- k) Propeller Components
- l) Propeller Operation

4. Ground Run Procedures 1.5 Hours

5. Review and Oral Quiz 1.5 Hours

6. Administration/ Clean up 0.5 Hours

7. Total Hours 35.0 Hours

Issue No.	3	SAFARILINK	Part	2

Issued	24 Dec 2025	Training Courses	Page	6

2.3 COURSE: CESSNA 208 SERIES WITH P&WC PT6A ENGINES TRAINING

A. COURSE DEFINITION

Course Objective:	The objective of this training is to provide <u>INITIAL</u> type training for maintenance personnel on the Cessna 208 Series (Caravan) with P&WC PT6A-114/-114A/-140 Engines , to enable them to properly maintain the aircraft and powerplant in accordance with the applicable manufacturer maintenance manuals, approved maintenance programme, and company procedures.
Candidate Qualification:	Candidates for this program should have completed a Basic aircraft course and those who have attained a license without type rating.
Instructor Qualification:	A qualified instructor authorized for the aircraft/engine type and course scope in accordance with Safarilink's approved instructor qualification and authorization procedures, or, where training is subcontracted, by the contracted ATO.
Teaching Methods:	Classroom lectures.
Course Time:	73.5 hours
Training Equipment:	Multimedia projector
Training Materials:	Training Manual and handouts
References	Textron Aviation / Cessna 208 Series and Pratt & Whitney Canada PT6A-114/-114A/-140 engine manuals
Recurrent Training	3-day / 21.0-hour Technical Continuation course, Every 24 Months.
Standard for Grading Students:	Written test will be given at the end of the course, passing grade of 75% is required. If a student does not obtain a passing grade the instructor will review the failed subject areas and retest the student.
Course Outline:	See the following page

B. COURSE OUTLINE

1. General Descriptions 5.5 Hours

- a) Introduction
- b) A/C Publications and MEL (ATA 100)
- c) A/C General and Servicing (ATA 5-12, 20)
- d) Damage Tolerance Design features
- e) Service Bulletins /Modifications
- f) Maintenance inspection program

2. Aircraft Systems 41.5 Hours

- a) ATA 21 Air Conditioning/ Pressurization 5.0
- b) ATA 22 Auto Flight 2.0
- c) ATA 23 Communication 2.0
- d) ATA 24 Electrical Power 4.0
- e) ATA 25 Interior and Furnishings 1.0
- f) ATA 26 Fire Protection 2.0
- g) ATA 27 Flight Controls 4.0
- h) ATA 28 Fuel Systems 4.0
- i) ATA 29 Hydraulic Systems 1.5
- j) ATA 30 Ice /Rain Protection 2.5
- k) ATA 31 Indicating & Recording 4.0
- l) ATA 32 Landing Gear 2.0
- m) ATA 33 Aircraft Lighting 1.5
- n) ATA 34 Navigation 2.0
- o) ATA 35 Oxygen Systems 1.0
- p) ATA 36 Bleed Air System 1.0
- q) ATA 37 Vacuum 1.0
- r) ATA 50-57 Aircraft Structures 1.0

3. Propeller (ATA 61) and Powerplant (ATA 71-80) 19.0 Hours

- a) ATA 61 Propellers 7.0
- b) ATA 71-80 Powerplant 12.0

4. Hands on Practical Element 3.5 Hours

5. Review and Test 4.0 Hours

6. Total Hours 73.5 Hours

Revision No.	0	MAINTENANCE TRAINING MANUAL	Section	2
Issued	24 Dec 2025	Training Courses	Page	8

2.4 COURSE: MECHANIC /INSPECTOR DUPLICATE INSPECTION

A. COURSE DEFINITION

Course Objective:	The objective of this training is to ensure that qualified and authorized personnel perform all Duplicate Inspections on aircraft or aircraft equipment in accordance with KCAA regulations, Safarilink procedures and operator's maintenance programs.
Candidate Qualification:	Candidates should have completed an initial aircraft course.
Instructor Qualification:	A designated Instructor as Qualified by Head of Quality.
Course Prerequisite:	Aircraft Phase II
Teaching Methods:	Classroom lectures.
Course Time:	12.0 hours
Training Equipment:	Multimedia projector
Training Materials:	Handouts.
References	Safarilink MPM, QPM, KCAA regulations Manufacturer M/M, Operator's manuals
Recurrent Training	Every 24 Months
Standard for Grading Students:	Written test will be given at the end of the course, passing grade of 75% is required. If a student does not obtain a passing grade the instructor will review the failed subject areas and retest the student.
Course Outline:	See the following page

B. COURSE OUTLINE

- 1. Maintenance Organization Policy Manual, Quality procedures Manual and Operators manual.**
 - a) Overview
 - b) Specific duties and responsibilities regarding the following subjects.
 - c) Airworthiness department responsibilities-Separation from production
 - d) Identify duplicate inspection items
 - e) Duplicate inspection Kist
 - f) Major Alteration and Repairs
 - g) KCAA instructions
 - h) Maintenance Records and Audits
 - i) Difference Between Airworthiness and Quality Assurance
 - j) Work interruption/Shift Change
 - k) Bogus parts
 - l) MEL/CDL procedures
 - m) Test Flights
- 2. Aircraft Type Specific**
 - a) Damage tolerant design
 - b) Standard Practices
 - c) Flight control rigging
 - d) Cable rigging
 - e) Engine rigging
 - f) Avionics
- 3. Weight and Balance**
 - a) Aircraft Specific Weighing Procedures
 - b) Weight and Balance Manual.

2.5 COURSE: STOCK RECEIVING INSPECTION

A. COURSE DEFINITION

Course Objective: The objective of this training is to ensure that qualified and authorized personnel are familiar with Safarilink receiving and accepting procedures.

Candidate Qualification: Mechanic/Inspector Required inspection item.

Instructor Qualification: A designated Instructor as Qualified by Head of Quality.

Teaching Methods: Classroom lectures.

Course Time: 12.0 hours

Training Equipment: Multimedia projector

Training Materials: Handouts.

References Safarilink MPM, QPM, KCAA regulations

Recurrent Training Every 24 Months

Standard for Grading Students: Written test will be given at the end of the course, passing grade of 75% is required. If a student does not obtain a passing grade the instructor will review the failed subject areas and retest the student.

Issue No.	3	SAFARILINK	Part	2
Revision No.	0	MAINTENANCE TRAINING MANUAL	Section	2
Issued	24 Dec 2025	Training Courses	Page	11

B. COURSE OUTLINE

1. Maintenance Organization Policy Manual, Quality procedures Manual and Operators manual.
 - a) Overview
 - b) Aircraft Records Familiarization
 - c) Approved Vendors List.
 - d) Airworthiness Tags
 - e) Component Overhaul & Tear down Report.
 - f) Component control
 - g) Airworthiness Directives
 - h) Shelf Life
 - i) Suspected Unapproved Parts Program
 - j) Quarantine Area
 - k) Protection & storage of Parts
 - l) Receiving inspection on the job Training
 - m) Calibration of Precision tools

2.6 COURSE: FUELING PROCEDURES

A. COURSE DEFINITION

Course Objective: The objective of this training is to ensure only properly trained personnel are involved in the fueling process.

Course Prerequisite: Head of quality must approve Vendor.

Candidate Qualification: Candidates should have completed the Phase 1 Familiarization course or three (3) years as a fueler.

Instructor Qualification: Any Inspector as qualified by Quality Assurance.

Teaching Methods: Classroom lectures.

Course Time: 2.0 hours

Training Equipment: Multimedia projector

Training Materials: Training handouts.

References Operator's Fueling Manual and Aircraft Ramp Manual

Standard for Grading Students: Written test will be given at the end of the course. A passing grade of 75% is required. If a student does not obtain a passing grade the instructor will review the failed subject areas and retest the student.

B. COURSE OUTLINE

1. Fuel storage Facilities Requirements

- a) Basic equipment requirements
- b) Records
- c) Safety equipment
- d) Quality Assurance

2. Safety

- a) Fuel Spills
 - i. Prevention.
 - ii. Response
- b) Fire
 - i. Prevention.
 - ii. Response
- c) Facility and Truck Safety equipment

3. Fuel Truck requirements

- i. Basic Equipment
- ii. Records
- iii. Safety Equipment
- iv. Quality Assurance

4. General Fueling Procedures

- a) Company Procedures
- b) Precautions

5. DHC-8 Procedures

- a) Description and Operation
- b) Capacities
- c) Refueling.
- d) Defueling
- e) Emergency Procedures
- f) Magna –stick use
- g) Truck positioning.

2.7 COURSE: DANGEROUS GOODS HANDLING PROCEDURES.

A. COURSE DEFINITION

Course Objective:	The objective of this course is to ensure that personnel assigned dangerous goods functions are trained and assessed as competent to perform those functions in accordance with applicable dangerous goods regulations and Safarilink procedures. Training shall include initial and recurrent training, as applicable to the assigned function.
Candidate Qualification:	This course applies to personnel assigned dangerous goods functions, including personnel responsible for handling in a warehouse, stores, baggage, cargo, loading, or other related operational functions, as applicable. Training shall be based on the employee's assigned function and not merely job title.
Instructor Qualification:	Any Inspector as qualified by Quality Assurance.
Teaching Methods:	Classroom lectures.
Course Time:	Course duration shall be as specified in the applicable Dangerous Goods Regulations Training Programme for the relevant function.
Training Equipment:	Multimedia projector
Training Materials:	Approved DGR training material, applicable company procedures, and current regulatory references.
Standard for Grading Students:	Assessment and completion standards shall be as specified in the applicable Dangerous Goods Regulations Training Programme for the relevant function.

Issue No.	3	SAFARILINK	Part	2
Revision No.	0	MAINTENANCE TRAINING MANUAL	Section	2
Issued	24 Dec 2025	Training Courses	Page	15

B. COURSE OUTLINE

Training shall cover, as applicable to the assigned function:

1. General familiarization with dangerous goods requirements.
2. Function-specific training for the duties the employee is required to perform.
3. Safety training, including recognition of dangerous goods, safe handling, and emergency response procedures.
4. Reporting procedures applicable to dangerous goods incidents, occurrences, or irregularities.
5. Initial and recurrent training requirements for the assigned function.

NOTE: The detailed syllabus, duration, assessment method, and completion standard for dangerous goods training shall be contained in the applicable Safarilink's Dangerous Goods Regulations Training Programme in force.

2.8 COURSE: AIRCRAFT GROUND HANDLING AND RAMP SERVICING

A. COURSE DEFINITION

Course Objective: The objective of this training is to ensure only qualified personnel are involved in handling the aircraft.

Candidate Qualification: Candidates should have completed modules 2 and 13.

Instructor Qualification: A designated Instructor as qualified by Quality Assurance.

Teaching Methods: Classroom lectures.

Course Time: 6.0 hours

Training Equipment: Multimedia and Overhead projector

Training Materials: Training handouts.

References: Appropriate Manufacturer Manual.

Recurrent Training: Every 24 Months.

Standard for Grading Students: Written test will be given at the end of the course, passing grade of 75% is required. If a student does not obtain a passing grade the instructor will review the failed subject areas and retest the student.

B. COURSE OUTLINE

1. Aircraft Type - Aircraft General

- a. Dimension and layout.
- b. Cargo Compartment.
- c. Caution areas.
- d. Doors
- e. Interphone system
- f. Electric Ground Power.

2. Aircraft Towing Procedures.

3. Aircraft Mooring.

4. Aircraft servicing.

5. Aircraft Marshalling

2.9 COURSE: MAINTENANCE INDUCTION

A. COURSE DEFINITION

Course Objective: To familiarize personnel with Safarilink Maintenance Organization, Policies and procedures.

Candidate Qualification: All entry level employees.

Instructor Qualification: A designated Instructor as qualified by Quality Assurance.

Teaching Methods: Classroom lectures.

Course Time: 12.0 hours

Training Equipment: Multimedia and Overhead projector

Training Materials: Handouts.

References MPM, QMSM & SMSM

Recurrent Training: Every 24 Months.

Standard for Grading Students: Written test will be given at the end of the course, passing grade of 75% is required. If a student does not obtain a passing grade the instructor will review the failed subject areas and retest the student.

Course Outline: See the following page

Issue No.	3	SAFARILINK	Part	2
Revision No.	0	MAINTENANCE TRAINING MANUAL	Section	2
Issued	24 Dec 2025	Training Courses	Page	19

B. COURSE OUTLINE

1. Introduction "Welcome to Safarilink"
2. Safarilink, History.
3. Safarilink, Employee Benefits.
4. Guest Speaker "Safarilink Culture"
5. Controlled Substance and Alcohol Abuse Policy
6. Security.
7. Tour of Safarilink Facilities, if training accomplished at home facility
8. Maintenance Policies and Procedures

2.10 COURSE: QUALITY CONTROL / INSPECTION

A. COURSE DEFINITION

Course Objective:	The objective of training is to provide familiarity with the many technical, operational documents and manuals related problems which may confront the inspector, the demarcations between various aspects of maintenance, airworthiness release requirements, Duplicate inspection procedures, etc
Candidate Qualification:	Candidates must complete the Phase 2 Initial and maintenance induction course.
Instructor Qualification:	A designated Instructor as qualified by Quality Assurance.
Teaching Methods:	Classroom lectures.
Course Time:	12.0 hours
Training Equipment:	Multimedia projector
Training Materials:	Training manual and Handouts.
References	Appropriate Manufacturer manuals
Recurrent Training:	Every 24 Months.
Standard for Grading Students:	Written test at the end of training.

B. COURSE OUTLINE

1. MPM, Operator MCM and MEL Manual

- a) Company Organization and Management
- b) Personnel Training
- c) Airworthiness Release Requirement, Procedures and Responsibilities
- d) Technical Records.
- e) Maintenance Test Flights.
- f) Stockroom Procedures.
- g) Duplicate inspection Procedures.
- h) Quality Audits.
- i) Difference between/ QC and QA / Separation from production.
- j) Difference between AMO and Airline Paperwork and
- k) Procedures
- l) MEL/CDL/ COI Procedures and limitations
- m) MSG 3.

2. Kenya Civil Aviation Regulations

- a) CFR 49
- b) FAR'S
- c) IATA
- d) AMO Regulations
- e) Personnel Licensing Regulations
- f) Airworthiness Regulations
- g) Other KCAA regulations as applicable.

3. Management Skills

4. Review and Test

5. Total Hours 12.0 Hours

2.11 COURSE: AIRWORTHINESS RELEASE AUTHORIZATION

A. COURSE DEFINITION

Course Objective: The objective of training is to provide the technician and Safarilink Inspector the requirements necessary for the Airworthiness Release Authorization.

Candidate Qualification: Phase I and Phase II courses, course and company Authorization to this course.

Instructor Qualification: A designated Instructor as qualified by Quality Assurance

Teaching Methods: Classroom lectures.

Course Time: 2.0 hours

Training Equipment: Multimedia and Overhead Projector

Training Materials: Training manual and Handouts.

References: Appropriate Manufacturer manuals

Recurrent Training: Every 24 Months.

Standard for Grading Students: Written test at the end of training. A passing of 75% is required. If a student does not obtain a passing grade the instructor will review the subject areas and retest the student.

Course Outline: See the following page

Issue No.	3	SAFARILINK	Part	2
Revision No.	0	MAINTENANCE TRAINING MANUAL	Section	2
Issued	24 Dec 2025	Training Courses	Page	23

B. COURSE OUTLINE

- 1. ICAO Annex 6**
- 2. ICAO Annex 8**
- 3. Purpose of Airworthiness Release**
- 4. Paperwork**
 - a) Requirements
 - b) Work Order
 - c) Parts Control
 - d) Documentation Procedures
 - e) Logbook
- 5. Limitations**
- 6. Review and Test**
- 7. Total Hours** **6.0 Hours**

2.12 COURSE: TAXI AND RUN UP

A. COURSE DEFINITION

Course Objective: The objective of training is to provide the Safarilink technicians the requirements necessary for the Taxi & Run –Up Authorization.

Candidate Qualification: Candidates require both the Phase I and Phase II courses and company Authorization to qualify for attendance to this course.

Instructor Qualification: A designated Instructor as qualified by Quality Assurance.

Teaching Methods: Classroom lectures.

Course Time: 6.0 hours

Training Equipment: Multimedia and Overhead Projector

Training Materials: Training manual and Handouts.

References: Appropriate Manufacturer manuals

Recurrent Training: Every 24 Months.

Standard for Grading Students: Written test at the end of training. A passing of 75% is required. If a student does not obtain a passing grade the instructor will review the failed subject areas and retest the student.

Course Outline: See the following page

B. COURSE OUTLINE

1. Aircraft Systems

- a) Engine Bleed, Air Conditioning, Pressurization
- b) Electrical.
- c) Fire Protection
- d) Airframe Fuel
- e) Hydraulic
- f) Ice / Rain Protection
- g) Landing Gear
- h) Lighting

2. Powerplant and Propeller

- a) Engine Component Description
- b) Powerplant Fuel System
- c) Electronic Engine Control
- d) Engine starting
- e) Ignition
- f) Oil, minimum pressure.
- g) Pneumatic
- h) Indicating
- i) Powerplant and Propeller controls

2.13 COURSE: HUMAN FACTORS

A. COURSE DEFINITION

Course Objective:	The objective of this course is to provide personnel with an understanding of Human Factors and safety programmes forming part of the organisation's Safety Management System, and to enable them to recognise human performance limitations in themselves and others and to avoid, detect and rectify errors and error-prone behaviour and practices.
Candidate Qualification:	All technicians, engineers, planners and managers involved in the engineering maintenance environment.
Instructor Qualification:	A designated instructor qualified in Human Factors and Safety Management System training.
Teaching Methods:	Classroom lectures or web-based training.
Course Time:	8.0 hours
Training Equipment:	Multimedia and Overhead Projector
Training Materials:	Human Factors training notes, handouts, case studies and applicable company safety material.
References	Appropriate Manufacturer manuals
Recurrent Training:	6 hours Recurrent training, every 24 Months.
Standard for Grading Students:	Students shall attend the full course and successfully complete the required assessment with a passing grade of 75%.
Course Outline:	See the following page

B. COURSE OUTLINE

1. Human Factors and Safety Management

General principles of Human Factors, safety management, incident awareness, hazard identification, risk assessment and risk mitigation.

2. Safety Culture and Organisational Factors

Safety culture, just culture, commitment to safety, awareness, behaviour and organisational influences on human performance.

3. Human Error, Performance and Limitations

Error models, violations, human reliability, situational awareness, memory, stress, fatigue, workload, fitness for duty, and the effects of alcohol, medication and drugs.

4. Workplace and Environmental Factors

Peer pressure, time pressure, shift work, noise, fumes, temperature, vibration, distractions, interruptions, manpower limitations and other workplace hazards.

5. Procedures, Documentation and Maintenance Practices

Visual inspection, work recording, use of procedures, technical documentation, critical maintenance tasks and error-capturing methods.

6. Communication and Teamwork

Shift and task handover, dissemination of information, cultural aspects of communication, responsibility, supervision, leadership and decision-making.

7. Professionalism and Integrity

Maintaining competence, avoiding error-provoking behaviour, assertiveness and professional conduct.

8. Organisation Safety Programme

Safety policy and objectives, reporting of errors and hazards, internal reporting, just disciplinary policy, investigation process, corrective action, feedback and safety promotion.

2.14 COURSE: FUEL TANK SAFETY

A. COURSE DEFINITION

Course Objective:	The objectives of this course is; This course will equip learners with the everyday challenges posed by the Fuel Tank Safety issues, ensuring standards of continued airworthiness of aircraft is/are achieved.
Candidate Qualification:	All Maintenance Technician and Engineers.
Instructor Qualification:	A designated Instructor as qualified by Quality Assurance
Teaching Methods:	Classroom lectures/Online lectures.
Course Time:	16.0 hours
Training Equipment:	Multimedia and Overhead Projector
Training Materials:	Handouts.
References	Part 145 Appendix IV to AMC to 145.A.30(e) and 145.B.10(3)
Recurrent Training:	Every 24 Months.
Standard for Grading Students:	Written test at the end of training. A passing of 75% is required. If a student does not obtain a passing grade the instructor will review the failed subject areas and retest the student.
Course Outline:	See the following page

Issue No.	3	SAFARILINK	Part	2
Revision No.	0	MAINTENANCE TRAINING MANUAL	Section	2
Issued	24 Dec 2025	Training Courses	Page	29

B. COURSE OUTLINE

Section 1: Theoretical Background

Section 2: Major Accidents

Section 3: SFAR 88 Reason and Goals

Section 4: SFAR 88 Results

Section 5: Using and Interpreting Information

Section 6: Preventing Fuel Tank Explosions

Section 7: Flammability Reduction Systems

Section 8: FTS During Maintenance

Section 9: Recording Maintenance Actions, Measures and Results

2.15 COURSE: ELECTRICAL WIRING INTERCONNECTION SYSTEM

A. COURSE DEFINITION

Course Objective:	The objective of this course is to give learners a full understanding of the changing certification and continuing airworthiness needs of EWIS, on large, fixed wing aircraft types, certified after 1st January 1958, to carry 30 passengers or more, or a cargo of 7,500lbs or more.
Candidate Qualification:	All Qualified staff performing EWIS maintenance.
Instructor Qualification:	A designated Instructor as qualified by Quality Assurance.
Teaching Methods:	Classroom lectures/ Online Lecture.
Course Time:	16.0 hours
Training Equipment:	Multimedia and Overhead Projector
Training Materials:	Handouts.
References	Part-21: 21.A.145 and 21.A.245. Part-145: 145.A.30(e) and 145.A.35(d). Part-M: M.A.706. Appendix A&B to AMC 20-22 Annex III to European Directive (ED) Decision 2008/007/R of 2g/08/2008 FAA.AC.120-94
Recurrent Training:	Every 24 Months.
Standard for Grading Students:	Written test at the end of training. A passing of 75% is required. If a student does not obtain a passing grade the instructor will review the failed subject areas and retest the student.

Issue No.	3	SAFARILINK	Part	2
Revision No.	0	MAINTENANCE TRAINING MANUAL	Section	2
Issued	24 Dec 2025	Training Courses	Page	31

B. COURSE OUTLINE

Introduction

Module A: General EWIS Practices

Module B: Wiring Practices Documentation

Module C: Inspection

Module D: Housekeeping

Module E: Wire

Module F: Connective Device Repair

2.16 COURSE: SAFETY MANAGEMENT SYSTEM

A. COURSE DEFINITION

Course Objective:	The objective of this course is to give employees an initial awareness of Safety Management Systems, how to set one up and the roles and responsibilities that all employees need to cultivate a successful safety culture within an organization.
Candidate Qualification:	All entry level employees.
Instructor Qualification:	A designated Instructor as qualified by Quality Assurance.
Teaching Methods:	Classroom lectures/ Online Lecture.
Course Time:	16.0 hours
Training Equipment:	Multimedia and Overhead Projector
Training Materials:	Handouts.
References	ICAO Safety Management Manual, Doc 9859 ICAO Annex 19, KCAR's, Safarilink SMS
Recurrent Training:	Every 24 Months.
Standard for Grading Students:	Written test at the end of training. A passing of 75% is required. If a student does not obtain a passing grade the instructor will review the failed subject areas and retest the student.
Course Outline:	See the following page

Issue No.	3	SAFARILINK	Part	2
Revision No.	0	MAINTENANCE TRAINING MANUAL	Section	2
Issued	24 Dec 2025	Training Courses	Page	33

B. COURSE OUTLINE

Introduction

Module A: Initial and Recurrent

Module B: Concept of Safety.

Module C: Accident Causation.

Module D: Errors and Violations.

Module E: Safety Culture.

Module F: Safety Regulatory requirements.

Module G: The SMS framework.

Module H: Safety Policy and Objectives.

Module I: Roles and responsibilities related to safety.

Module J: Risk Management principles.

Module K: Safety Assurance principles.

Module L: Safety Reporting Systems including their use and benefits to the organization.

Module M: Safety Communication and Education; and Safety Documentation

2.17 COURSE: AVIATION SECURITY

A. COURSE DEFINITION

Course Objective:	The objective of receiving Aviation Security Training is to ensure awareness of potential acts of sabotage and unlawful interference in aircraft operations, and to act in the most appropriate manner to reduce such risks.
Candidate Qualification:	All entry level employees.
Instructor Qualification:	A designated Instructor as qualified by Quality Assurance.
Teaching Methods:	Classroom lectures.
Course Time:	16.0 hours
Training Equipment:	Multimedia and Overhead Projector
Training Materials:	Handouts.
References	Safarilink Security Manual, KCARs & Case Studies (Video presentations), & Case Studies (Video presentations).
Recurrent Training:	Every 24 Months.
Standard for Grading Students:	Written test at the end of training. A passing of 75% is required. If a student does not obtain a passing grade the instructor will review the failed subject areas and retest the student.
Course Outline:	See the following page

B. COURSE OUTLINE

1.1 Security

1.2 Acts of unlawful interference

1.3 Airside

1.4 Landside

2.1 Organization

2.2 History

2.3 Objectives of security operations

3.1 Measures relatives to access control

3.2 Measures relating to airplane

3.3 Measures relating to passengers and baggage

4.1 Prevention

4.1.1 Sabotage

4.1.2 Hijacking

4.1.3 Extortion

4.1.4 Personnel threats

4.1.5 Different levels of threat

4.2 Response

4.2.1 Suspicious object found on-board

4.2.2 Procedures

4.2.3 Actions to minimize the risk of explosion

4.2.4 Suspicious object found on-board airplane on the ground

4.3 Communication with the hijacker

2.18 COURSE: DHC-8-400 SERIES TYPE TRAINING

A. COURSE DEFINITION

Course Objective:	The objective of this training is to provide a technician with basic understanding of the DHC-8-400 Series and P&WC PW150A powerplant, to properly maintain it in accordance with the Manufacturer Maintenance Program.
Candidate Qualification:	Candidates for this program should have completed Basic aircraft course and those who have attained a license without type rating.
Instructor Qualification:	a designated Instructor as qualified by Quality Assurance on aircraft type.
Teaching Methods:	Classroom lectures.
Course Time:	147.0 hours
Training Equipment:	Multimedia and Overhead projector
Training Materials:	Training Manual and handouts
References	Appropriate DeHavilland of Canada & Pratt and Whitney manuals
Standard for Grading Students:	A written test will be given at the end of the course, passing grade of 75% is required. If a student does not obtain a passing grade the instructor will review the failed subject areas and retest the student.

B. COURSE OUTLINE

- | | |
|--|--------------------|
| 1. General Descriptions | 5.5 Hours |
| <ul style="list-style-type: none"> a) A/C Publications and MEL (ATA 100) b) A/C General and Servicing (ATA 5-12, 20) | |
| 2. Aircraft Systems (excluding ATA 37 and 47) | 100.5 Hours |
| <ul style="list-style-type: none"> a) ATA 21 Engine Bleed, Air Conditioning, Pressurization b) ATA 22,23,31,34,44,46 Avionics, Indication/Recording c) ATA 24 Electrical Power d) ATA 25 Interior and Furnishings e) ATA 26 Fire Protection f) ATA 27 Flight Controls g) ATA 28 Fuel Systems h) ATA 29 Hydraulic Systems i) ATA 30 Ice and Rain Protection j) ATA 32 Landing Gear k) ATA 33 Aircraft Lighting l) ATA 35 Oxygen Systems m) ATA 36 Bleed Air System n) ATA 38 Water and Waste o) ATA 45 On-Board/ Central Maintenance p) ATA 49 APU q) ATA 50-57 Structures | |
| 3. Propeller (ATA 61) and Powerplant (ATA 71-80) | 21.0 Hours |
| <ul style="list-style-type: none"> a) ATA 61 – Propeller Components and Operations b) ATA 71 – Electronic Control Harness Lightning Protection c) ATA 72 – Engine Component Description d) ATA 73 – Powerplant Fuel System e) ATA 73 – Electronic Engine Control f) ATA 74 – Ignition g) ATA 75 – Pneumatic h) ATA 76 – Controlling i) ATA 77 – Indicating j) ATA 80 – Engine Starting | |
| 4. Review and Test | 12.0 Hours |
| 5. Hands on Practical Element | 8.0 Hours |
| 6. Total Hours | 147.0 Hours |

2.19 COURSE: DHC-8-400 SERIES TECHNICAL CONTINUATION

A. COURSE DEFINITION

Course Objective:	The objective of this training is to provide recurrent technical continuation training for maintenance personnel on the DHC-8-400 Series and PW&C PW150A engine, with emphasis on current airworthiness information, system review, maintenance practices, and continued competence in line and base maintenance activities in accordance with the applicable maintenance manuals and approved training curriculum.
Candidate Qualification:	Candidates for this programme should be maintenance personnel who have previously completed DHC-8-400 Series type training and those who have attained a license without type rating.
Instructor Qualification:	a designated Instructor as qualified by Quality Assurance on aircraft type.
Teaching Methods:	Classroom lectures.
Course Time:	35.0 hours
Training Equipment:	Computer-aided instruction, overhead projector, whiteboard or sandwich board, live aircraft or component samples, and type-specific tools and test equipment, as applicable.
Training Materials:	Student Technical Training Manual, Student Technical Schematics Manual, student hand-outs, engine maintenance manuals, Illustrated Parts Catalogue, Minimum Equipment List (MEL), and web-based training or virtual reality where available.
References	De Havilland DHC-8-400 and Pratt & Whitney Canada PW150A technical manuals, together with applicable airworthiness reports, service difficulty reports, and current technical publications used during the course.
Standard for Grading Students:	A written test will be given at the end of the course, passing grade of 75% is required. If a student does not obtain a passing grade the instructor will review the failed subject areas and retest the student.

B. COURSE OUTLINE

1. General Descriptions 16.0 Hours

- a) Course Introduction
- b) Aircraft Recent News (ADs)
- c) ISARs/ Service Difficulty Reports
- d) Airworthiness Reports
- e) A/C General and Servicing (ATA 5-12, 20)

2. Aircraft Systems (excluding ATA 37 and 47) 12.0 Hours

- a) ATA 21 Engine Bleed, Air Conditioning, Pressurization
- b) ATA 22,23,31,34,44,46 Avionics, Indication/Recording
- c) ATA 24 Electrical Power
- d) ATA 25 Interior and Furnishings
- e) ATA 26 Fire Protection
- f) ATA 27 Flight Controls
- g) ATA 28 Fuel Systems
- h) ATA 29 Hydraulic Systems
- i) ATA 30 Ice and Rain Protection
- j) ATA 32 Landing Gear
- k) ATA 33 Aircraft Lighting
- l) ATA 35 Oxygen Systems
- m) ATA 36 Bleed Air System
- n) ATA 38 Water and Waste
- o) ATA 45 On-Board/ Central Maintenance
- p) ATA 49 APU

3. Propeller (ATA 61) and Powerplant (ATA 71-80) 4.0 Hours

- a) ATA 61 – Propeller Components and Operations
- b) ATA 71 - 80 – Powerplant Systems

4. Ground Run Procedures	1.0 Hour
5. Review and Oral Quiz	2.0 Hours
6. Total Hours	35.0 Hours

MAINTENANCE TRAINING MANUAL

CHAPTER 3: TRAINING REQUIREMENTS AND PROGRESSION

3.1 TIMELINE REQUIREMENTS

A. GENERAL

To ensure that each member of Safarilink is trained in a timely manner, following timelines have been established.

B. AIRFRAME AND POWERPLANT TECHNICIANS

- | | |
|---|------------------------------|
| 1. Maintenance Employee Orientation | Before assigned to duty |
| 2. Phase 1 Training | Before assigned to duty |
| 3. Phase 2 Training | With 6 – 12 months of D.O.H. |
| 4. Phase 3 Recurrent | 24 months from Phase 2 |
| 5. Supervisor/ Senior Mechanic Training | Prior to assuming duties. |

C. QUALITY CONTROL INSPECTOR/OFFICER

- | | |
|---------------------------------------|---|
| 1. Maintenance Employee Orientation | Before assigned to duty |
| 2. Phase 1 Training | Before assigned to duty |
| 3. Phase 2 Training | With 6 – 12 months of D.O.H. |
| 4. AW Release Training | Prior to granting AW release |
| 5. Quality Control Inspector Training | Prior to starting QC |
| 6. Duplicate inspection Training | Prior to granting duplicate inspection. |
| 7. Taxi / Run –up training | prior to Taxi/ Run –up Authorization. |
| 8. Phase 3 Recurrent | 24 months from last Phase 2 |
| 9. Duplicate Inspection Recurrent | 24 months from last R2 |
| 10. AW Release Recurrent Training | 24 months from last AW. |

3.2 PROGRESSION CHARTS

A. AVIONICS, AIRFRAME AND POWERPLANT TECHNICIANS

Issue No.	3	SAFARILINK	Part	2
Revision No.	0	MAINTENANCE TRAINING MANUAL	Section	3
Issued	24 Dec 2025	Training Requirements and Progression	Page	6

3.3 CHECKING /TESTING & FEEDBACK FOR SUCCESSFUL COURSE COMPLETION

The forms listed below shall be used to assess students' competence and obtain feedback from the relevant Supervisor, Instructor, or Examiner. They shall also be used to determine successful course completion and to support evaluations for Technical Manpower progression.

The applicable forms are:

- i. Form QAM 52
- ii. Form QAM 19
- iii. Form QAM 30
- iv. Form QAM 62
- v. Form QAM 58

Copies of these forms are included as annexes to Chapter 4.

MAINTENANCE TRAINING MANUAL

CHAPTER 4: NON-CERTIFYING STAFF ASSESSMENT

Issue No.	3	SAFARILINK	Part	2
Revision No.	0	MAINTENANCE TRAINING MANUAL	Section	4
Issued	24 Dec 2025	Non-certifying Staff Assessment	Page	2

4.1 GENERAL COMPETENCY

The following general criteria will be used to assess technicians and non-certifying mechanics for competence and will also be applied as a measurement for promotion. Uncertified staff assessment is the responsibility of the Head of Base Maintenance and Head of quality.

1. Examination
2. Maintenance Task competence.
3. Six-month appraisal report.

The six-month appraisal will be completed by the mechanic's supervisor on the prescribed company form.

4.2 AIRFRAME AND POWERPLANT MECHANIC COMPETENCY

A. EXAMINATIONS

1. Cleaner/ Helper to Mechanic 1

This examination will be based on modules 2 and 3 basic courses, and routine maintenance on the type specific.

2. Mechanic I to II

This examination will be based on modules 3 and 4 basic courses, and Type Aircraft Systems and Power Plant.

3. Mechanic II to III

This examination will be based on modules 1,4,5,7 and 8 basic courses, and Type Aircraft Systems and Power Plant.

4. Mechanic III to Senior Mechanic

All promotions will be determined by performance and ability to satisfy present grade requirements.

B. MAINTENANCE TASKS [OJT]

1. Mechanic I

- a) Wheel Changes
- b) Wheel Pressure Checks
- c) Oleo Servicing
- d) Safety and Wire locking
- e) Hydraulic System Servicing
- f) Fuel System Servicing
- g) Jacking
- h) Routine Maintenance, Pre-flight and Daily Checks
- i) Completion of all documents for all relevant tasks

Issue No.	3	SAFARILINK	Part	2
Revision No.	0	MAINTENANCE TRAINING MANUAL	Section	4
Issued	24 Dec 2025	Non-certifying Staff Assessment	Page	4

2. Mechanic II

- a) Wheel Build up
- b) Brake Replacement
- c) Brake Build up
- d) Landing Gear Component Replacement
- e) Sheet Metal Repairs
- f) Corrosion Treatment and Protection
- g) Hydraulic System Component Replacement
- h) Control surface removal and installation
- i) Control Cable Replacement
- j) Towing of Aircraft
- k) Hangar Maintenance Checks
- l) Snag Rectification
- m) Completion of all documents for all tasks relevant

3. Mechanic III

- a) Landing Gear Component Replacement
- b) Steering Rigging
- c) Removal, installation and rigging of Flight Controls
- d) Sheet Metal Repairs
- e) Reinforced Plastic /composite/honeycomb repairs
- f) Installation and Adjustments of Doors
- g) Removal, installation, and Rigging of engines
- h) Engine component replacements (PCU, HMU, Prop, etc)
- i) Snag Rectification
- j) Completion of all documents for tasks relevant

4. Senior Mechanic

- a) Senior mechanics are required to fulfill and meet the requirements of all grades. They are required to assist the certified mechanics in their role of technical supervision notwithstanding the fact that the certifying mechanic has ultimate certification responsibility in all instances.

Issue No.	3	SAFARILINK	Part	2
Revision No.	0	MAINTENANCE TRAINING MANUAL	Section	4
Issued	24 Dec 2025	Non-certifying Staff Assessment	Page	5

4.3 AVIONICS MECHANIC COMPETENCY

A. EXAMINATIONS

1. Cleaner/ Helper to Mechanic 1

This examination will be based on modules 2 and 20 basic courses, and routine maintenance on the type specific.

2. Mechanic I to II

This examination will be based on modules 20, 21, 31 based Radio biased and systems installed in the company aircraft.

3. Mechanic III to Senior Mechanic

This examination will be based on Modules (Regulations) 20, 21, 22 (Electrical and Instruments) 31 and 32 Radio and Radar. Systems installed in company Aircraft.

B. MAINTENANCE TASKS [OJT]

1. Mechanic I

- a) Functional test on the aircraft type Systems: HF, VHF, Audio Selector Panel, Public Address, Cockpit Voice Recorder, ADF, VOR, LOC, Glide slope and Marker Beacon
- b) Proficient use of the following tools: Chuck tool, Crimping Tool, Megger, Bonding Tester, Analog and Digital Multi-meters, Wattmeter, Capacitance Meters, Auditory Signal Generators, Oscilloscopes, Soldering Iron, De-soldering Tools and Conductivity Testers.
- c) Routine Maintenance on type
- d) Minor Repairs to aircraft Radio and electrical Harness and Ground Communication Equipment
- e) Complete maintenance on batteries, i.e. Deep Cycle.
- f) Test on Emergency Light System
- g) Completion of all documents for all relevant tasks

Issue No.	3	SAFARILINK	Part	2
Revision No.	0	MAINTENANCE TRAINING MANUAL	Section	4
Issued	24 Dec 2025	Non-certifying Staff Assessment	Page	6

2. Mechanic II

- a) Functional test on aircraft type System: ATC Transponder, GPS, DME, HF, VHF, Audio Selector Panel, Public Address, Cockpit Voice Recorder, ADF, VOR, LOC, Glideslope Marker Beacon ELT and Resistance Bridge.
- b) Proficient use of following tools and test equipment: VHF and HF Signal Generators, VOR/ILS Test Set, DME Test, Audio Power Meters, Frequency Counters, Analyzers, Distortion Analyzers, GO/NO GO Gauges and Resistance Bridge.
- c) Repair of Aircraft Radio and Electrical Harness.
- d) Repair of Ground Communication VHF and HF Equipment.
- e) Routine Maintenance on type
- f) Loop Swing on type
- g) Ground Communication: Installation of HF Antenna and Radio Transceivers
- h) Minor repairs and troubleshooting of aircraft Radio, Electrical and Ground communication Equipment
- i) Replacement of Electrical and Radio components
- j) Starter / Generator brush change
- k) Completion of all documents for all tasks relevant

3. Mechanic III

- a) Function and Ramp Test on all Radio and Electrical equipment/items installed on aircraft type
- b) Proficient use of all Radio, Electrical and Instrument Test Equipment except nav. 402 and ATC 600A.
- c) Modifications to airborne Radio, Electrical and Instrument systems.
- d) Installation of modified/ additional Radio, Electrical and Instrument Equipment.
- e) Repair of Radio Electrical Equipment and Instruments (with the workshop capability)
- f) Scheduled Maintenance Checks for the type
- g) Troubleshooting and rectification of Radio, Electrical and Instrumental snags.
- h) Completion of all documents for tasks relevant

Issue No.	3	SAFARILINK	Part	2
Revision No.	0	MAINTENANCE TRAINING MANUAL	Section	4
Issued	24 Dec 2025	Non-certifying Staff Assessment	Page	7

4. Senior Mechanic

- a) Senior mechanics are required to fulfill and meet the requirements of all grades. They are required to assist the certified mechanics in their role of technical supervision notwithstanding the fact that the certifying mechanic has ultimate certification responsibility in all instances.

4.4 STAFF PERFORMANCE APPRAISAL

A. PURPOSE

This form documents the performance of employees as assessed by their immediate Supervisor/Manager and is used as a measurement for promotion. The form is initiated by the Supervisor/Manager bi- annually.

B. PROCEDURES

1. Rating to be completed by the Supervisor/Manager.
2. Comments to be completed by the Supervisor/Manager.
3. Recommendations to be made by the Supervisor/Manager
4. Supervisor/Manager to enter employee's name
5. Employee will append signature after performance is discussed
6. Employee will enter date
7. Supervisor/Manager will enter his/her name.
8. Supervisor/Manager will enter signature.
9. Supervisor/Manager will enter date
10. Head of Base Maintenance will complete as necessary.
11. Head of Base Maintenance will enter his/her signature.
12. Head of Base Maintenance will enter date.

C. DISTRIBUTION

The supervisor/ Manager completing the form shall forward the original to the Head of Base Maintenance for processing After Processing the Head of Base Maintenance shall forward a copy to Quality Assurance for filing into the employee's Training Record. A copy will be given to the student for his/ her own reason.

D. RECORD KEEPING

Staff Performance Appraisal, FORM: QAM/52 will be retained permanently as part of the individual employee's Training Record.

4.5 ANNEX. QAM COMPETENCE ASSESSMENT FORMS

AMO Staff Competency Assessment Form QAM/52A

Candidate:		Date:	
Current Position: Intern/Cleaner/Helper		Test Position Mechanic 1/Technician 1	
Supervisor:		ICA No.	
Initial Line Maintenance / Recurrent Check <i>Delete as appropriate</i>		Next Due: <i>Competency Check due every 24 Calendar Months</i>	
* 5 – EXCELLENT 4 – GOOD 3 – FAIR 2 – POOR 1 - UNSATISFACTORY			
Check-In Procedures	Date	Grade	Remarks
Appearance / Attire			
Punctuality			
Courtesy & Discipline			
Ramp Safety	Date	Grade	Remarks
Airside Attire and ID			
Security Procedures and Awareness			
Hazard Awareness			
Safety Precautions			
Airside Markings Awareness			
Aircraft Pre- Flight & Ground Handling	Date	Grade	Remarks
Aircraft Cleanliness			
Aircraft Servicing			
Towing/Push Back			
Fuelling and Safety Precautions			
Aircraft Securing & Mooring Procedures.			
Marshalling Signals & Procedures			
Team Work & Resourcefulness	Date	Grade	Remarks
Liaison with Operations			
Liaison with Crew			
Liaison with Other Engineering Staff			
Liaison with Other Companies Engineering Staff			
Work Flow Control			
Paper work accomplishment.			
Turn-Round & Post-Flight Line Duties	Date	Grade	Remarks
Tech- Log information Dissemination.			
Wheel Change			

Wheel Pressure Checks			
Oleo servicing.			
Safetying and Wire locking			
Hydraulic system Servicing & Replenishment.			
Pneumatic system Servicing & Replenishment.			
Fuel System servicing & Replenishment			
Aircraft Jacking			
Routine Maintenance & Daily checks			
Completion of all relevant tasks documents.			
Knowledge Areas	Date	Grade	Remarks
General Policies and Procedures			
Hazard Reporting / Occurrence Forms			
MPM – Line Maintenance Procedures.			
Ground Handling Manual			
Aircraft Differences and Familiarization			
Total Grades			

Supervisor’s AMEL No. _____ Supervisor’s Signature _____

Head of quality _____ Signature/Stamp _____

***Grading and Proficiency Standards**

Grade	Assessment	Standard
1	Unsatisfactory	Unsafe performance; lacks aptitude, knowledge, skill or ability to perform the assigned duty task or operation. Errors not corrected. Needs re-training.
2	Poor	Unsafe performance; has minimal knowledge, skill or ability to perform the assigned duty task or operation. Errors mostly recognized but corrected too late. Needs additional training or exposure.
3	Fair	Acceptable performance; The assigned duty, task or operation, while safe, does not completely meet the required standards. Possible to improve with further self-training and practice.
4	Good	The assigned duty task or operation is performed satisfactorily. Minor errors recognized and corrected. Adequate understanding of the task.
5	Excellent	The assigned duty task or operation is performed skillfully and efficiently. Minor errors recognized and corrected immediately. Full understanding of the task.

Trainees/Candidates shall demonstrate acceptable levels of knowledge, skill and proficiency in:

- Decision Making and Communication;
- Team workmanship and Resourcefulness;
- Preparing Aircraft for Safe flight.

AMO Staff Competency Assessment Form QAM/52B

	Trainings Feedback Form	Form №: QAM/47 Issue Date: Nov 2017 Revision: 00 Page 1 of 1
---	--------------------------------	---

NAME OF COURSE	
FACILITATOR	
DATE OF TRAINING	

NAME OF TRAINEE (optional)	
-----------------------------------	--

Please indicate with an X your personal grading of the items listed below.

Grading	Poor	Average	Good	Very Good	Excellent
COURSE.					
Grade how the course content met your expectations.					
How did you experience the speed or the rate at which the training was presented?					
Can you practically apply the course material to your daily work situations?					
How will the course affect your ability to perform your job from now on?					
How would you rate the focus and structure of the course?					
FACILITATOR					
How knowledgeable was the facilitator on the subject matter?					
Did the facilitator explain the concepts clearly and in an understandable way?					
How did the facilitator handle questions that were asked?					
How would you rate their facilitation skills as a whole?					
VENUE					
Was the venue sufficient for the type of training presented?
